

## NEWS LETTER

### Aesthetix and Terra Drone sign partnership to provide drones services to Oil and Gas Industries.

15th July, 2019, Aesthetix signed an exclusive agreement with Terra Drone from Japan to provide its services to the oil and gas industries in middle east. Terra drone is a pioneer in the technology of industrial drones and provides various solutions such as inspection of tanks, flare stacks,, chimneys, offshore FPSO inspection, security surveillance of pipelines, unmanned surveillance, 3 D mapping and much more in aerial surveys.

Shutdowns can be made shorter or avoided for inspections of flare stacks, FPSO inspection devoid of any harsh weather conditions. Similarly, a wide shift in the field of surveillance is foreseen as huge costs reductions are possible in terms of manpower and infrastructure. Terra Drone is actively working with Aesthetix team to further develop more solutions based on the requirements of customers in the region.

*“Understanding the challenges faced by our customers, Aesthetix as always has been in the forefront of providing customized solutions. I hope our association with Terra Drone will add more value to our customers.” Says Emil George , GM of Aesthetix.*

*Terra Drone is a leading drone services company with headquarters in Japan and presence in more than 20 countries. Provides innovative drone solutions like aerial surveys, infrastructure inspection, thermal mapping, UAV data processing, etc., for a wide variety of industries.*
